Model Y 32. Declaration on voting for the European Parliament in the Netherlands

You live in the Netherlands and are a national of another European Union member state. This means you can choose in which country you vote for the European Parliament. You can use this form to declare that you vote in the Netherlands and not in your member state of origin. If you wish to vote in your country of origin, you don't need to do anything for the Dutch authorities.

After you have submitted this declaration, you will remain registered in the Netherlands as a voter for the European Parliament (as long as you live in the Netherlands). If you wish to change your registration and once again vote in your member state of origin, contact your municipality to revoke this declaration and register with the authorities of your member state of origin.

When to submit this declaration?

The municipality in which you are registered must have received this form (**before the 9th of april 2019**) at least 44 days before the voting date. You will receive a voting card which allows you to vote.
